Integrated Design in Contemporary Architecture by ...

Integrated design is a comprehensive holistic approach to design which brings together specialisms usually considered separately. It attempts to take into consideration all the factors and modulations necessary to a decision making process. A few examples are the following: Design of a building which considers whole building design including architecture, structural engineering, passive solar building design and HVAC. The approach may also integrate building lifecycle management and a greater co

Integrated design - Wikipedia

An integrated design process interlaces the multiple disciplines that inform a building. A series of steps can provide an orderly flow to this dialogue, and the full and constructive participation of all members of the design and delivery team will ensure the best results.

Heritage architecture reinvented in modern design In this feature we focus on our Woollahra houses where we integrated a Victorian cottage in a modern house setting. Architectural journalist Stephen Crafti interviewed us about the design and below is his engaging recount:

Heritage Architecture Reinvented | Porebski Architects

Modern architecture was an architectural movement that embraced minimalism, internationalization and principle-based design. This should not be confused with architecture of the modern-era, that was produced in various styles. Modern architecture was the dominant form of architecture for corporate, government and institutional structures in the period 1930-1970.
