The model S pistols are identical to the larger A and B series, even to the degree that they all are shipped with the same manual (they even have tiny, removable barrel bushings!). Though the tipping barrel locked breech seems un-necessary, it allows the gun to be much lighter than most competing straight-blowback designs.

Operating Manual
The model A pistol is the 9 mm Largo variant of the A/B series of 1911-inspired pistols that led Star design for the next 60 years. The models A, B, P and M had roughly comparable updates over the years. Many other models were related to this series; for example, the model S is simply a scaled-down model A/B series design, and was first produced concurrent with the earliest model As, in 1922.
