The screening of natural products continues to be the origin of countless therapeutic agents [53]. Greater plants like a source for brand new potential drugs continues to be largely untouched and only a tiny proportion of these continues to be exposed to phytochemical analysis and also the fractions posted to medicinal screening is extremely low.

Phytochemical screening of medicinal plants thesis writing

In this systematic review of the use of phytochemicals for management of pain in cancer therapy, we identified a lack of quality research literature on this subject (). While we were able to demonstrate a slight therapeutic benefit use of phytochemicals in the management of cancer pain, this benefit did not achieve statistical significance, which is a function of both the quality and marginal number of the studies that were acceptable for inclusion in a systematic review.

Systematic Review of the Use of Phytochemicals for ...
